

CDM 2015 – Principal Designer Support Services

'In liaison with the client and principal contractor, the principal designer has an important role in influencing how the risks to health and safety should be managed and incorporated into the wider management of a project. Decisions about the design taken during the pre-construction phase can have a significant effect on whether the project is delivered in a way that secures health and safety. The principal designer's role involves co-ordinating the work of others in the project team to ensure that significant and foreseeable risks are managed throughout the design process.'

HSE legal (L) series guidance on the Construction (Design and Management) Regulations 2015 (paragraph 97)

Project Management, Cost Consultancy, Mechanical & Electrical Consultancy
Building Surveying, Project Safety, BREEAM Assessors and Sustainability

How can Edmond Shipway help you?

- Tailor-made support to assist you to meet the requirements of the CDM 2015 regulations.
- Review and set up CDM management arrangements with the client and project team including assistance with the 'client brief'.
- Attend initial site visits, review the client's requirements, plans and design proposals to identify potential hazards and develop risk mitigation measures based on the principles of prevention.
- Assist with the management, monitoring and co-ordination of the project team, setting up a project CDM risk register and arranging CDM reviews at key design stages.
- Provide model documents, best practice examples and guidance to help ensure that risks during construction and for those maintaining or cleaning, or using the structure as a workplace are suitably considered, eliminated or controlled.
- Manage the gathering and provision of pre-construction information (PCI) including the preparation of PCI 'Pack'.
- Prepare or review the health and safety file including the initial file to be in place prior to the construction phase commencing.

Our CDM Capability – skills, knowledge and experience

- Our Project Safety team has extensive experience across most sectors including residential, commercial, retail, education, leisure and healthcare.
- Projects range from small scale fit-outs to £150 million plus projects including alteration and refurbishment projects on 'live' sensitive sites and works in city centre locations including major new build and mixed use developments.
- We pride ourselves on our proactive and innovative approach, providing vital assistance to clients and developing and sharing best practice with project teams.
- As part of a multi-disciplinary consultancy we are able to draw on a vast pool of experience. We work closely with contractors, end users and facilities managers to ensure that constructability, building use and maintenance issues are addressed at the earliest possible stage of project planning and design.
- Our credentials speak for themselves. Edmond Shipway was one of the first companies in the UK to achieve Registered Practice status with the Association for Project Safety (APS) and hold Safety Schemes in Procurement (SSIP) Certification as a designer, demonstrating our CDM capability. In addition, we also hold certification to ISO 9001, ISO 14001 and Investors in People.
- Our staff are qualified to the highest level and strategically placed within our network of offices across the UK. We have the expertise, resources and commitment to ensure you meet the needs of your business. Our team, from a variety of design and construction backgrounds, includes Registered Members and Fellows of the APS, Chartered Members of the Institution of Occupational Safety and Health and individuals on the Occupational Safety and Health Consultant Register.
